

PA/ABS Compatibilizer ST-AN3220

Product Profile

ST-AN3220 is a maleic anhydride functionalized Acrylonitrile Butadiene Styrene (ABS) and is used to improve the compatibility of PA/ABS alloy, endowing alloy products with excellent processability and mechanical properties.

Specification

Item	Unit	Value
Appearance		yellowish granule
MAH Content	%	high
Melt Index (265°C, 10kg)	g/10min	50-80

Feature

1. ST- AN3220 has the characteristics of high rigidity, low residue, and low odor.
2. ST- AN3220 can be used as an interface compatibilizer between PA and ABS, improving the compatibility of the system and enhancing the mechanical properties of the mixed system.

Recommended Dosage

The recommended dosage for ST-AN3220 is 3-8%.

Package & Storage

25kg/package. It's not classified as dangerous goods. Transport it as ordinary chemicals. Avoid light and moisture during transportation and storage.
