

Serving a Wide Spectrum of Manufacturing Industries

The 38th International Exhibition on Plastics and Rubber Industries

Chinaplas® 2026
国际橡塑展

17 Theme Zones

Automotive

- Environmentally Friendly & Low-carbon Materials
- Lightweight Materials
- Impact-resistant & Heat-resistant Plastics

Packaging

- Sustainable & Eco-friendly Solutions
- High Barrier Food Grade Materials
- Automatic, Intelligent & Multitasking Integration Packaging

Building & Infrastructure

- Low Halogen Environmentally Friendly Flame Retardant
- HDPE Pipe Extrusion Line
- Multi-material Co-extrusion

Electronics & Electric

- Biomass Balance Technology
- Composite Materials Enable Functional Integration
- Ultra-high Flowability & Thin-wall Molding Technology

New Energy

- High-weather-resistance Encapsulation Technology
- Lightweight Structural Material Technology
- Smart Functional Film Technology

Medical & Healthcare

- Biocompatibility
- High Precision Injection Moulding
- China's New Innovative Materials

Recycling

- Food Grade PCR
- Chemical Recycling
- High-performance Bio-based Materials

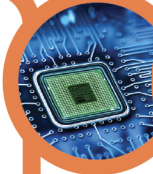

Sports & Leisure

- Anti-bacterial
- High Resilience Performance
- Lightweighting

Machine Exhibits

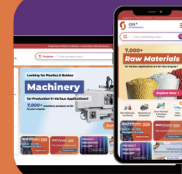

- Auxiliary & Testing Equipment Zone
- Blow Molding & Thermoforming Machinery Zone
- Die & Mould Zone
- Extrusion Machinery Zone
- Film Tech Zone
- Injection Molding & Smart Manufacturing Solutions Zone
- Flexible Plastic Packaging Machinery Zone
- Recycling Tech Zone
- Rubber Machinery Zone

Material Suppliers

- Additives Zone
- Bioplastics Zone
- Chemicals & Raw Materials Zone
- Colour Pigment & Masterbatch Zone
- Composites & High Performance Materials Zone
- Recycled Plastics Zone
- Thermoplastic Elastomers & Rubber Zone

Innovative Products Zone

The Digital Platform Empowering the Extension of Your Plastics & Rubber Supply Chain

Immense in the World's Leading Plastics & Rubber Trade Fair

Discover Concurrent Events to Unleash Infinite Possibilities

4.20

Plastics Recycling & Circular Economy Conference and Showcase

The conference will focus on circular economy policies, applications of recycled and other green materials, and intelligent recycling technologies. The conference aims to convene brand owners, recyclers, material suppliers, and equipment manufacturers to explore low-carbon innovation and industry trends.

4.21

Medical Plastics Connect

In the competitive medical landscape, technological innovation, regulatory compliance, and green transition have become the definitive pillars of market leadership. This conference provides an exclusive lens into relevant high-tech domestic materials and world-class frontier technologies.

4.21-24

InnoAccelerate

The market urgently demands the commercialization of R&D projects featuring new technologies and new products. Universities possess high-quality innovation resources and scientific research achievements. The industry-university-research cooperation platform serves as a reliable bridge for technological innovation between enterprises and universities, driving sustainable innovation and development of the industry.

4.21-23

The Power of Plastics Forum

Hear from VDMA experts and industry leaders about breakthrough recycling technologies, smart processing of recyclates, and AI-driven digital solutions like digital twins and product passports. See sustainable innovations in action and connect with global peers who are driving the circular economy.

4.21-23

Tech Talk

Tech Talk will serve as the launchpad for more than 30 innovative technologies, presented by leading suppliers in their worldwide debut. It will cover 5 sessions: Innovative packaging solutions, Green and low-carbon solutions, Automotive plastics solutions, 2026 new materials, and Specialized & Niche Chinese Technology Presentations(NEW).

4.21-24

Product Innovation Gallery

With the theme "From Products to Technology. From Technology to Products," 7 giant display walls showcase over 200 meticulously crafted products. Upgraded displays on both sides focus on large-scale themed exhibits, enhancing visual impact. Premium displays are presented by Liuzhou Jingye and HBHR.

4.22-23

Additives Seminar

Making its highly anticipated debut at CHINAPLAS, the Additives Seminar will gather global industry leaders to showcase high-value solutions, helping chemical suppliers and user brand enterprises navigate cost and compliance challenges through innovative additives that drive ESG goals and enhance product safety.

4.23

Applications in Focus

7 themed forums at Applications in Focus, joining forces with the plastics and rubber end-user manufacturers and branding companies, reveal the pain points of the end-user sectors and seek collaborative solutions across the supply chain. The forums cover over 50 hot topics, including automotive, medical, packaging, antimicrobial, cables, eco-friendly PVC products and etc.

4.23

Smart Molding, Shaping the Future

This forum centers on two pivotal industry trends: "Intelligent Transformation" and "Sustainable Development". We will delve into how robotics, AI, and management systems drive intelligent upgrades and operational excellence. Additionally, we will examine how green manufacturing builds core competitiveness in the face of global market demands and environmental regulations, opening a new chapter for sustainable growth.

4.24

Day 4 Trend Insights

Grand Finale on CHINAPLAS Day 4! Join us for the full-day customized itinerary: Attend the "Decode Trends Forum" to discover plastic aesthetics behind CMF trends and the core technologies in emerging industries, followed by an exclusive VIP Factory Tour in the afternoon. Don't miss the show!

4.24

Development Day for Campus Elites

The Development Day for Campus Elites is back in glory! In partnership with the Shanghai Plastic Industry Association, we forge close links with graduates from the top 211/985 universities. Through alumni sharing, corporate briefings, university-enterprise face-to-face exchanges and guide tour for campus elites, we build a direct bridge between top graduates and high-quality enterprises.
