

WHY VISIT

Gather Global Plastics and Rubber Industry Elites at a Convergence Point

At CHINAPLAS, we move beyond "making products" to "solving production challenges". Explore how smart manufacturing, automation, and advanced materials come together to deliver scalable, low-carbon solutions — unlocking a competitive advantage grounded in sustainability.

Witness Live Demonstrations and Quantify Your ROI

With 3,800+ machines in action, covering injection molding, extrusion, automation, and recycling, visitors can compare performance, precision, and energy efficiency. Evaluate real time output, material savings, and cycle times to drive data-driven ROI decisions.

Gain Actionable Foresight to Stay Ahead of the Curve

Themed events, tech seminars and industry forums provide deep dives into bioplastics, composites, 3D printing and AI-driven quality control beyond the show floor, offering global insights to help your team anticipate market shifts and drive sustainable growth.

Accelerate Your Innovation Cycle through Cross-industry Inspiration

CHINAPLAS brings together a wide spectrum of application sectors like automotive, electronics, advanced packaging, medical and new energy in one place. Expose your team to cross-industry technologies to leverage proven solutions, spark breakthrough ideas, and shorten development timelines—fueling your next big innovation.

16 THEME ZONES

MACHINE EXHIBITS

- Auxiliary & Testing Equipment Zone
- Blow Molding & Thermoforming Machinery Zone
- Extrusion Machinery Zone
- Film Tech Zone
- Flexible Plastic Packaging Machinery Zone
- Injection Molding & Smart Manufacturing Solutions Zone
- Recycling Tech Zone
- Rubber Machinery Zone

MATERIAL SUPPLIERS

- Additives Zone
- Bioplastics Zone
- Chemicals & Raw Materials Zone
- Colour Pigment & Masterbatch Zone
- Composites & High Performance Materials Zone
- Recycled Plastics Zone
- Thermoplastic Elastomers & Rubber Zone

INNOVATIVE PRODUCTS ZONE

SERVING A WIDE SPECTRUM OF MANUFACTURING INDUSTRIES

Automotive

- Lightweight technology
- Integrated injection molding technology
- Flame-retardant, heat-resistant, and high-voltage insulation materials

Packaging

- Single-material lamination
- AI detection
- Functional packaging

Electronics & Electric

- High thermal conductivity modification technology
- Bio-based and recyclable materials
- PFAS-free

Medical & Healthcare

- Biocompatible materials
- High precision injection molding
- Liquid Silicon Rubber (LSR) injection molding

Sports & Leisure

- Lightweight with high resilience
- Soft and skin-friendly
- Breathability, flexibility, and shock adsorption

Recycling

- Food-grade PCR
- High performance bio-based materials
- Fully biodegradable materials

Building & Infrastructure

- PVC-O pipe extrusion line
- High efficiency high production
- Multi-material co-extrusion

New Energy

- Thermal conductive polyimide film
- Ultra-thin BOPP film for capacitor
- PVDF film for solar panel backplane
