Building Electricals

Real estate developers, construction contractors, architectural design institutes, engineers, importers and exporters, wholesalers and distributors, etc.

Scope of Exhibits

- Primary equipment and technology for electric power transmission and distribution
- Secondary equipment and technology for electric power transmission and distribution
- New energy grid connection and related technologies and equipment
- Materials for power transformation and transmission
- Energy storage systems and EPC engineering projects
- Energy storage equipment and related products
- Energy storage technology/materials
- Integrated solar-storage-charging system
- Intelligent manufacturing equipment for electric power
- Digital devices and software
- Low-voltage electrical equipment and materials
- Smart electricity management technology and systems for end-users
