SHOW HIGHLIGHT

Opening Ceremony

On November 18, EP Shanghai 2025 held its official opening alongside the China Electricity Council's 2025 Annual Meeting, blending high level exchange with technical showcases. The opening address was delivered by Mr Xin Baoan, President of the China Electricity Council and Chairman of the Global Energy Interconnection Development and Cooperation Organization and hosted by Yang Kun, Executive Vice Chairman of the China Electricity Council. The event was attended by key government officials, industry leaders, and global business representatives.

TECHNICAL SEMINARS

EP Shanghai 2025 energized the industry with more than **30** seminars over three days, highlighting advances in energy transition, carbon reduction, efficiency, and innovation. The flagship "Smart Digital Energy Empowers New Power Systems" summit, hosted by the China Electricity Council, brought together leading experts and end users. A rich program of forums and technical sessions covered policy and practice for micro-grids, virtual power plants, zero carbon parks, green factories, and multi industry users, including major tracks on hydrogen-power collaboration, integrated innovation, green manufacturing, and virtual power plant ecosystems—breaking silos and enabling cross sector exchange.

NEW PRODUCT GALLERY

A series of launches spotlighted cutting edge equipment, digital platforms, virtual power plant controls, energy storage safety systems, and core hydrogen components. Companies presented breakthroughs in technology, real world applications, business models, and project case studies.

Factory Visit

Business Matching

To promote efficient supply-demand matching, EP Shanghai hosted more than 90 business-matching sessions and factory visits—including Huaming, Shanghai Electric, and LAZZEN—creating targeted cooperation platforms for domestic and overseas buyers and exhibitors. These initiatives fostered deeper collaboration across the industry value chain, while the strong participation of high-quality buyers and professional visitors highlighted EP Shanghai's role as a key international platform for exchange and cooperation in the power industry.

VISITORS OVERVIEW

TOP 10 OVERSEAS VISITORS BY COUNTRY

Hear What Our Visitors Said

Every time in EP we can find something new to us. Exhibitors' equipment is really reliable and has fantastic performance; it could be useful even in Russia. I see that people here understand the process and implement these technologies at a high professional level. We are a service company, and our customers will appreciate this equipment and technology. We have many projects in Russia and Uzbekistan. Last year, we had a collaboration with Jiangsu Aukura Intelligent Power Co. Ltd. Now, we are working with Taikai Power Engineering Co. Ltd. on a major substation in Moscow, implementing its 500kV GIS to expand the substation. We also have many projects in power transformers, and we have found partners at EP who are able to help us develop our aluminium industry. As we can see, every time we are in EP, we find more partners, and exhibitors find more possibilities to go outside to the market, like Russia. So it is very interesting. That's why it is my second job to come to EP to provide more opportunities to exhibitors at EP and find more interesting solutions for our company.

EP is a big expo and there are many suppliers here. It is very convenient for us. We appreciate that EP has pray rooms, which is very friendly to Muslim buyers and encourages them to come to EP. Overall, we are satisfied with EP; we got many supplier contacts here and are looking forward to collaborating with them.

Thank you the opportunity to attend EP Shanghai. It was a well-organized and insightful event. We had the chance to connect with several valuable manufacturers during the exhibition, and following the event, we arranged additional meetings with some of them. We are now exploring potential business collaborations and are optimistic about establishing long-term partnerships. I truly appreciate the opportunity to be part of such a professional platform and look forward to joining you again at the next EP Shanghai in December 2026.

It is my first time at EP and I am looking for switch gear. I am really excited and surprised that all the main suppliers in the EPC components market are here. The quality and quantity of exhibitors are impressive. We are very happy to be here and hope to find more products at EP.

I used to come to EP, last year also come. It is a very nice exhibition and we are collaborating with some Chinese companies. Rocoi is one of our partners we met in EP.
