Empowering Change, Crafting the Future Together

The global home furnishing industry has undergone transformative challenges in recent years. From pandemic disruptions to fierce market “involution” and the revival of globalization, every step brought both pressures and opportunities. Amidst this backdrop, China's woodworking and furniture manufacturing industries showcased remarkable resilience, breaking barriers and driving innovation through transformation.

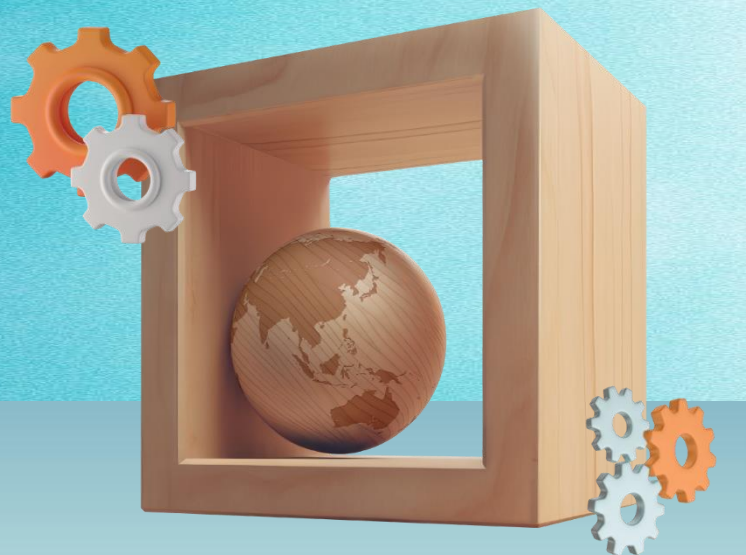

At WMF 2025, with the theme “**Tech-Driven Mastery, Connecting Globally**”, we unite the industry's power to address challenges head-on. Focusing on **Machinery, Materials, and Components**, WMF highlights how cutting-edge, efficient, and sustainable technologies unlock cost-effective solutions, empowering businesses to shine on the global stage.

*This is more than just an exhibition
—it's where transformation begins:*

- **For businesses** - It's a bridge to overcome limits and reach global success.
- **For buyers** - It's a gateway to experiencing the excellence of China's manufacturing.
- **For the industry** - It's a milestone in collaboration, shaping a more interconnected future.

We warmly invite you to join us at this grand event, to explore the pathways to breaking barriers amidst “involution” & embrace the new future of globalization through collaboration.

Intelligent Machinery

Smart, digitalized, and flexible woodworking and furniture production equipment, including panel production lines, solid wood processing lines, surface treatment solutions, and machinery for upholstery production.

- Optimize production efficiency for enterprises
- Reduce production costs
- Accelerate smart manufacturing transformation

WMF2025: Focused on "Machinery · Materials · Components" for Full Industry Chain Value

Green Materials

Highlighting new eco-friendly and high-performance materials, such as engineered wood panels, upholstery materials, and sustainable resources.

- Showcase sustainable solutions for production processes
- Meet enterprises' needs for innovative manufacturing

Precision Components

A comprehensive offering of tools, furniture hardware, cutting tools, and automated accessories, designed to enhance production efficiency and improve the quality of end products.

- Deliver comprehensive component support
- Empower furniture manufacturers to enhance product competitiveness

NECC (Hongqiao, Shanghai)
Hall 8.1

Empowering Upholstery with Flexible Intelligence

The global consumption market for upholstered furniture has reached a staggering \$80 billion as of 2023, representing approximately 15% of the overall furniture market. China, as the leading global producer of upholstered furniture, accounts for 46.4% of the market's production value and 30.7% of its consumption rate. As this booming market continues to expand, diversification, intelligence, and fashion have emerged as key trends that are driving the advancement of intelligent manufacturing in China.

In line with this, UPHOLSTERY TECH 2025 (Shanghai International Exhibition on Upholstery Technology for Home Furnishing) acts as a premier platform for professionals in the upholstery industry to showcase their products and exchange innovative ideas. By fostering global collaboration and influence, the expo seeks to shape the future of the upholstered furniture sector.

Concurrent Exhibition:

Sylva Wood Expo Shanghai

2025. 9. 09—12
NECC
Hall 7.1

Launched in 2015, Sylva Wood Expo is jointly organized by the China Timber & Wood Products Distribution Association (CTWPDA), Shanghai Timber Trade Association, and Pablo Publishing & Exhibition Pte Ltd. As Asia's only trade fair dedicated to wood raw and auxiliary materials, it has emerged as a key platform for global sourcing and industry networking.

The 2024 edition, held from June 24–26 in Shanghai, welcomed nearly 100 exhibitors—70% of whom represented overseas markets including U.S., Russia, Germany, Canada, and Malaysia—showcasing high-demand products including hardwood, softwood, logs, engineered panels, plywood, LVL, CLT, veneer, and solid wood components to a targeted and professional buyer audience.

*Full Access to Cutting-edge Furniture,
Building Materials and Wood Products Production Technology*

Major Exhibits

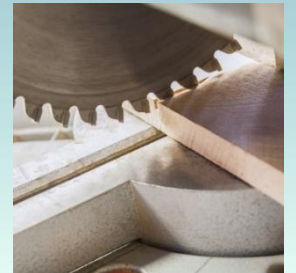

- Tools and Machinery for Custom and Mass Production
- Machine Components and Automation Technology
- Surface Treatment Technology
- Wood-Based Panel Production
- Wood Primary Processing, Sawmill Technology, Energy from Wood
- Wooden Architecture Technology
- Forestry Technology
- Green Production & Safety Control
- Wood Products Packaging
- Raw Materials & Accessories for Wood Production
- Knives, Blades, Machinery Accessories and Hand Tools
- Engraving Machinery
- Upholstery Machinery and CAD/CAM Technology
- Digital Printing Technology
- Timber, Wood based panel, Wooden Door, Floor & Moulding, Wood Chemical Auxiliary
- Bamboo & Wood Processing Technology

Witnessing the Power of Synergy: Honoring Outstanding Partnerships in Woodworking and Furniture Manufacturing

WMF 2024 Woodworking & Furniture "Synergy Award"

Since 2023, WMF has introduced the "Woodworking & Furniture Synergy Award," where exhibitors nominate a close furniture manufacturing partner to receive joint recognition, with interviews conducted at the partner's factory.

In 2024, WMF partnered with a renowned media platform to launch an exclusive interview series, spotlighting collaborations between woodworking machinery manufacturers and furniture makers along China's East Coast. The series delivered high-quality insights on industry synergy, celebrating successful partnerships and highlighting achievements in woodworking and furniture manufacturing.

On-Site Award Ceremony

Promoting High-Quality Production for the Panel Board Industry

21st National Symposium on Wood-based Panel Industry Advancements

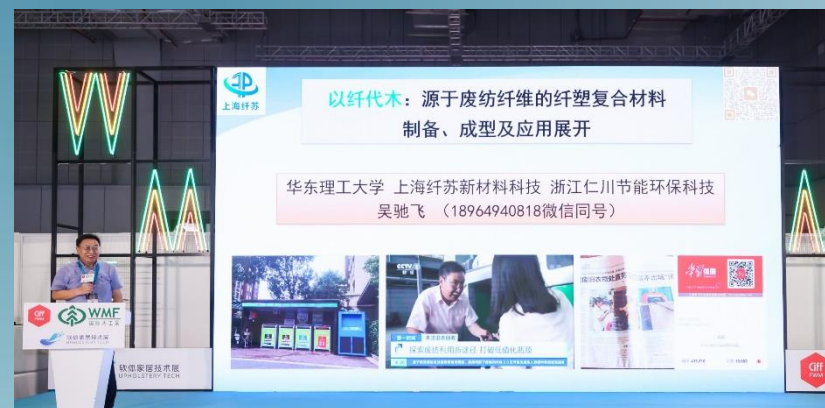

Organized by the China Forestry Machinery Association and the China National Forestry Industry Association, this seminar in Suzhou gathered nearly 500 industry representatives. Focusing on "High-Quality Production," 31 experts and industry leaders discussed innovations in smart manufacturing and sustainable practices, laying a foundation for knowledge sharing in alignment with WMF 2024's commitment to sustainable development.

Shaping the Future with Plastic Wood, Energy Efficiency, and Automation

Plastic Wood Drives Green Development – Plastic Wood Equipment Focus

With a focus on green and recyclable plastic wood materials, this event invited experts and companies to explore green development opportunities in plastic wood machinery. Discussions covered energy-efficient and automated production, carbon-neutral technologies, and fiber-reinforced applications, advancing sustainable practices within the non-metallic materials sector.

"Fiber for Wood: Preparation, Molding, and Application of Fiber-Plastic Composite Materials Derived from Waste Textile Fibers"

Joining Forces with Exhibitors & Furniture Brands Partnering with Online Influencers to Ignite New Media Strategies

The 2024 China Home Furnishing New Media Innovation Conference

The conference was hosted by the WMF 2024 and the Pan Home Influencer Union. Co-organizers included the Suzhou Home Furnishing Association, Qingdao Home Furnishing Industry Association, Zhejiang Doors Industry (Custom Furnishing) Association, and the China East Furnishing Base.

This conference brought together entrepreneurs, managers, and influential content creators from the light luxury and high-end customization sectors to discuss trends, build founder branding, and explore collaborative innovation. It provided fresh insights for the industry and sparked new media strategy inspiration.

Innovation Drives the Future : Outstanding Exhibits Lead New Trends in Woodworking and Furniture

WMF Top Picks 2024

The China National Forestry Machinery Association and Adsale Exhibition Services Ltd. organized the "WMF Top Picks 2024" where 21 companies and 24 exhibits were recommended to the industry. These award-winning products showcase exceptional innovation and market expansion potential. We believe they will play an essential role in shaping the future of woodworking and furniture manufacturing.

The Exhibitors

Showcasing Innovation and Success at WMF

WMF provided an excellent platform for showcasing our innovation, helping us boost our brand visibility. The event's organization and on-site services allowed us to effectively present our new products. We look forward to further collaboration!

Mr. Qu Huajian
Sales Manager, Giantway

Exceeding Expectations: A Truly Beneficial Experience

The exhibition exceeded expectations, and the organizer's thoughtful arrangements allowed us to enjoy an exceptional experience. This collaboration has enhanced our growth momentum for the future, and we look forward to continued partnership!

Mr. Cao Xitao
Sales Manager, Qianchuan

Innovation and Sustainability: WMF Sets the Benchmark for the Industry

WMF's focus on global innovation and sustainable development aligns with Siempelkamp's values. This platform offered business opportunities and helped drive industry progress. Looking forward to WMF 2025!

Hear What Our 2024 Visitors Have to Say!

Innovative Equipment, Outstanding Experience

WMF is the go-to event for China's panel manufacturing industry, and we make it a priority to attend each year. The range of advanced equipment is impressive, and the organizer's thoughtful setup, including engaging activities, made this year's experience especially rewarding.

Ningfeng Group

Comprehensive Display, Strong Approval from Members

This was the first year our association organized a group visit to WMF. The extensive equipment showcase, from international to local brands, was a big hit with our members. We're eager to return next year!

Wenzhou Furniture Chamber of Commerce

Seamless Global Networking

As first-time visitors, we were amazed by WMF's scale and diversity. The business matching service helped us connect efficiently, and translation support made communication easy.

Interiors by Design (UK)

Effective and Targeted Business Matching

The business matching service was excellent. We connected with almost 90% of our target companies, and nearly all were highly relevant to our needs.
